INTRODUCTION

SHRI JASNATH TESTING AND CALIBRATION LABORATORY, a testing division of **SHRI JASNATH LABORATORY PRIVATE LIMITED**, is a recognized testing laboratory recommended by the National Accreditation Board for Testing and Calibration Laboratories (NABL), a constituent board of the Quality Council of India.

Established in 2022, the laboratory is dedicated to providing accurate, reliable, and unbiased testing services. It has developed strong expertise in the testing and analysis of construction and industrial materials, offering a comprehensive range of Mechanical, Physical, Chemical, and Non-Destructive Testing (NDT) services.

All testing activities are carried out by highly qualified and experienced technical personnel with international exposure, strictly based on customer-specific requirements and approved standard methods. We provide complete industrial testing solutions to support quality control and project execution. Testing is conducted in accordance with National and International Standards such as IS, ISO, ASTM, SSPC, PIP, JIS, EN, BS, AWS, ASME, API, and other applicable codes. The team at **Shri Jasnath Laboratory Pvt. Ltd.** supports clients in selecting the right quality materials, ensuring projects are completed successfully and on schedule.

The laboratory is certified to ISO 9001:2015, ISO 14001:2015, and ISO/IEC 17025:2017, and is managed by a team of experienced professionals. It delivers critical testing services to a diverse and high-quality customer base.

The laboratory was established under the leadership of **Er. MANGI NATH SIDH**, who has over 12 years of experience in testing and quality assurance with prestigious organizations and currently serves as the Technical Director.

We conduct testing of a wide range of materials, including Cement, Fly Ash, Micro Silica, Lime, Coarse and Fine Aggregates, Ballast, Bricks, AAC Blocks, Hollow and Solid Blocks, Building Stone, Tiles, Rock, Bitumen, Bituminous Mix, Bitumen Emulsion, Paver Blocks, Soil, Water, Admixtures, Curing Compounds, Reinforcement Steel, MS Channels, Aluminum Sections, Structural Steel, HTS Wire, Couplers, Flush Doors, Wood, Timber, Granular Sub-Base (GSB), Wet Mix Macadam (WMM), Water Bound Macadam (WBM), Bentonite, and Hardened Concrete.

We also offer on-site testing and field investigation services, including Rebound Hammer Test, Ultrasonic Pulse Velocity (UPV), Half-Cell Potential Test, Concrete Core Cutting, Compaction Tests (Core Cutter and Sand Replacement), Earth Resistivity Test, Standard Penetration Test (SPT), Road Roughness Test, EV2 Test, Plate Load Test, Bridge Load Test, Pile Integrity Test, and complete Geotechnical Investigation.

All test certificates issued by **Shri Jasnath Laboratory Pvt. Ltd.** are accepted by Government Authorities, Private Sector Organizations, and consulting agencies across India and internationally. The laboratory is equipped with high-precision, modern testing instruments, ensuring world-class measurement accuracy and reliable results.

QUALITY POLICY

SJTCL is committed to good professional practices and compliance to applicable regulations to ensure the quality of operations in its testing.

SJTCL shall implement management system as per ISO/IEC 17025:2017 as applicable, to generate technically valid data and results.

SJTCL shall ensure that all personnel involved in the quality of operations familiarize with the policies and procedures of the management system and implement the same in their work.

SJTCL is committed to produce reliable and error free test results.

SJTCL shall ensure customer satisfaction by maintaining independence, impartiality and integrity in its operations, and improving its management system continuously.

QUALITY OBJECTIVES

- Providing reliable testing services, accurately and timely, to the satisfaction and requirements of customers.
- Commitment to ensure the impartiality, confidentiality, competence and consistence operation of the laboratory activities.
- To ensure confidentiality of customer information.
- Continual improvement and up gradation of services and laboratory facilities in accordance with changing customer requirements.
- Improving customer satisfaction feedback index.
- Increasing resource generation.

To meet the above objectives, the laboratory follow the management system appropriately for the scope of their activities and meeting the requirements of NABL criteria of accreditation and ISO/IEC: 17025:2017 – “General requirements for the competence of testing and calibration laboratories”, and are provided with necessary resources.

The laboratory is committed to follow good professional practices and provide highest possible standard of services to the customers at all times, and continually improve the effectiveness of the management system.

All personnel concerned with the testing activities of the laboratories shall familiarize themselves with the content of the Laboratory Quality Manual and comply with its policies and procedures laid down in the Laboratory Quality Manual and associated documentation, at all times.

FOUNDER'S MESSAGE

“A nation's strong infrastructure is built on accurate testing and reliable quality.”

The purpose behind establishing **Shri Jasnath Laboratory Pvt. Ltd.** has always been to provide the most reliable, accurate, and scientific testing services — not only in Rajasthan but across India.

We firmly believe that the foundation of every successful project lies in its quality, and true quality can only be ensured through standardized testing, an experienced technical team, and an honest work ethic.

Our laboratory is equipped with state-of-the-art instruments, highly trained technical experts, and processes aligned with international standards.

We are committed to delivering Precision, Transparency, and Time-bound Services in every report we issue.

Our goal is to contribute to India's infrastructure development by providing testing services of the highest quality and integrity.

Shri Jasnath Laboratory Pvt. Ltd. assures that we will continue to work with honesty, quality, and reliability for our clients, engineers, contractors, and government institutions.

VISION

To elevate the quality standards of India's infrastructure development and remain the most trusted Testing & Calibration Laboratory in Rajasthan.

I express my heartfelt gratitude to my entire team, our clients, and every individual whose trust and support have helped this institution reach where it stands today.

All Construction Material Testing

SJTCL Civil Engineering Laboratory is a **NABL-accredited, state-of-the-art facility** providing comprehensive construction material testing for civil engineering and infrastructure projects. Equipped with **high-precision, calibrated instruments** and advanced setups, the laboratory performs both **physical and chemical tests** on a wide spectrum of construction materials under controlled environmental conditions.

All testing is carried out strictly in accordance with **Bureau of Indian Standards (BIS/IS Codes), Indian Roads Congress (IRC) Specifications, and international standards such as ASTM, BS, and AASHTO**, ensuring results that meet **national and global quality benchmarks**.

Recognizing that material quality directly affects the **strength, durability, and service life of structures**, SJTCL relies on a team of **qualified civil engineers, material specialists, and technicians** to maintain **robust quality control** throughout every stage of construction.

Operating under **NABL guidelines**, the laboratory maintains meticulous **documentation, calibration records, and traceability**, guaranteeing **accurate, reliable, and reproducible results**.

Our testing services support a wide range of sectors, including **residential and commercial buildings, roads, highways and bridges, railways and metro projects, industrial and manufacturing facilities, water supply, sewage and irrigation projects, and public infrastructure and urban development**.

With a reputation for **professionalism, timely reporting, and stringent adherence to quality standards**, SJTCL has become a **trusted partner for construction material testing**, consistently earning high satisfaction from clients across all sectors.

Geotechnical / Soil Investigation

At our laboratory, **Geotechnical and Soil Investigation** is carried out by a **highly qualified and experienced team of geotechnical engineers, geologists, and field technicians**. All works are performed in accordance with **relevant Indian Standards (IS Codes), IRC (Indian Roads Congress) guidelines, and recognized geotechnical reference manuals and books**. Our objective is to accurately determine the **subsurface conditions** and provide a reliable foundation design for safe, economical, and durable structures.

Geotechnical drilling is a critical component of this investigation, ensuring that the ground conditions are suitable for the intended foundation. Our process includes **borehole drilling, sampling (disturbed and undisturbed), in-situ testing, and comprehensive laboratory testing** to establish a detailed **soil and rock profile**. This information helps evaluate the bearing capacity, settlement characteristics, and potential geotechnical risks of the project site.

By integrating **field data, laboratory results, and engineering judgment**, our team provides a complete geotechnical assessment that supports safe and efficient foundation and structural design.

Our Geotechnical Capabilities Include:

- Drilling in soil and rock formations up to 150 meters depth
- Conducting Standard Penetration Tests (SPT), Dynamic Cone Penetration Tests (DCPT), and Static Cone Penetration Tests (SCPT)
- Collection of disturbed and undisturbed soil and rock samples
- Determination of bearing capacity, settlement, and shear strength parameters
- Preparation of comprehensive soil investigation and geotechnical reports

Why Choose Our Laboratory

- Conducted by an expert multidisciplinary team with strong field and lab experience
- Fully equipped geotechnical testing laboratory with advanced instruments
- Investigations and reports prepared as per IS, IRC, and international standards
- Ensures accuracy, reliability, and safe foundation design solutions

CONCRETE MIX DESIGN

At our laboratory, **Concrete Mix Design** is carried out by a team of **qualified and experienced professionals** using **standardized procedures as per IS:10262, IS:456, and other relevant Indian Standards (IS Codes)**. Our aim is to design concrete that is **economical, workable, durable, and strong**, ensuring superior performance and reliability in every project.

The process involves a scientific and systematic selection of materials and their proportions to achieve the desired performance requirements. Since the characteristics of raw materials such as cement, aggregates, and water vary, our laboratory places strong emphasis on **experimental testing, data analysis, and expert evaluation** to determine the most accurate and practical mix proportions.

Concrete is an extremely versatile construction material that can be designed for strength grades ranging from **M10 to M100 and above**, depending on project specifications. Our lab ensures that every mix design meets not only the **structural strength requirements** but also the **durability, workability, and sustainability** expectations of modern construction standards.

Our Laboratory's Objectives in Mix Design

- Designed and verified as per **IS:10262 and IS:456**
- Conducted by an **expert team of engineers and technicians**
- Achieve **target strength with accuracy and consistency**
- Ensure **durability, density, and homogeneity** of concrete
- Maintain **cost efficiency** with uncompromised quality
- Promote **sustainable construction practices** through optimized resource use

ISO 9001 : 2015 AND ISO 14001 : 2015 CERTIFIED LABORATORY**

TESTING SERVICES - CEMENT (OPC/PPC/PSC), FLYASH, AGGREGATE (COARSE / FINE), BRICKS (CLAY / FLYASH), AAC BLOCK, SOLID & HOLLOW BLOCKS, PAVER BLOCKS, SOIL (CLAY / SANDY), CURING COMPOUND, ADMIXTURE, TMT BAR / COUPLER / HT-STRAND, STAINLESS STEEL / MS CHANNEL, ALUMINUM SECTION, BUILDING STONE, ROCK, LIME POWDER, FLUSH DORS / TIMBER / WOOD, BITUMEN, BITUMEN EMULSION, DBM/BC/SDBC/BM, WMM, WBM, GSB, BENTONITE, CONCRETE TILES, CERAMIC TILES, WATER (DRINKING AND CONSTRUCTION), HARDNED CONCRETE (CUBE / CORE / BEAM), GEOTECH INVESTIGATION, NDT TESTING AND LOAD TEST.

Non Destructive Testing (NDT)

Non-Destructive Testing (NDT) is a critical method for evaluating the integrity of construction materials and structures without causing any damage. By detecting flaws, weaknesses, or deterioration, NDT provides a **cost-effective and reliable means** to assess the quality and safety of materials while ensuring their continued suitability for their intended purpose.

In civil engineering, **concrete and reinforced concrete structures**, both new and existing, require non-destructive testing to evaluate **footings, foundations, columns, beams, and slabs**. NDT helps determine **residual strength, material quality, and structural safety**, enabling informed decisions for construction, maintenance, or rehabilitation when necessary.

SJTCL Laboratory is equipped with **state-of-the-art NDT equipment** and a **team of competent engineers and technicians**, capable of performing a wide range of non-destructive tests with precision and accuracy. Our testing ensures **structural reliability and long-term durability**, supporting safe and efficient construction practices.

Key NDT services at SJTCL include:

Rebound Hammer Test – for assessing surface hardness and estimating concrete strength.

Ultrasonic Pulse Velocity Test – for detecting cracks, voids, and quality consistency in concrete.

Pile Integrity Test – for evaluating the structural integrity of piles and deep foundations.

Half Cell Potential Test – for detecting corrosion activity in reinforced concrete.

Carbonation Test – for measuring the depth of carbonation and evaluating concrete durability.
